

Discover the adventure of shrimp fishing in Ostend!

Come with your team, group of friends or association and experience the unique adventure of shrimp fishing. You'll be fitted with a pair of waders and a yellow oilskin jacket. Before we head into the water, you'll learn to read the sea. Together you'll prepare the trawl net and wade into the sea side by side. It's a unique team-building experience where you feel and taste the sea. Besides shrimp fishing, you'll also learn "longe-côte" or sea wading, the new trend that lets you explore the sea in a unique way.

Shrimp fishing takes place in the surf, right where the waves break! Two guide-animators ensure safety and explain the catch. Do you know what a weever fish is, which jellyfish sting, how to safely hold a crab, and what the difference is between a turbot and a flounder? We fish with respect for nature.

After the shrimp fishing, you can enjoy a relaxed chat over a drink, while hearing captivating anecdotes about the life of fishermen and taking a visual journey through the world of the shrimp.

All available dates can be found below. Be quick to book!

Combo-teambuilding

Want to tailor the experience for your whole team? Then choose our "combo-teambuilding"! Team members who would rather not go into the sea can take part in the "Beach Walk". This walk is themed around "Experience the North Sea Shrimp", during which the catch is examined together, followed by the "Après Krui" with a drink afterwards.

Please note!

The best shrimp are caught during shrimp season in autumn. Although we cannot guarantee a catch, our experienced guide-animators ensure an unforgettable experience regardless of the result. The catch depends on the season, the wind, the water temperature, the current... But rest assured, our experienced guide-animators always turn it into a unique experience.
